PROFESSIONAL SUMMARY

B.Tech Information Technology student targeting the Software Engineer (Salesforce) opportunity, with a strong foundation in C++, Python, JavaScript, SQL, Data Structures & Algorithms, OOP, DBMS, Operating Systems, and Computer Networks. Hands-on experience with React.js, Node.js, Express.js, REST APIs, Streamlit, debugging, functional testing, and data-driven applications. Basic working knowledge of Java and AI/ML fundamentals, with a strong interest in enterprise software, API-driven systems, and learning CRM platforms.

TECHNICAL SKILLS

Programming: C++, Python, JavaScript, Java (Basic), SQL

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Web & Backend: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs, JSON

AI / Data: AI/ML Fundamentals, Data Preprocessing, Machine Learning Concepts, Python Data Analysis, Streamlit

Tools & Testing: Git, GitHub, VS Code, Linux/Bash Basics, Debugging, Functional Testing, API Testing & Integration

EDUCATION

B.Tech in Information Technology — J.S.S. Academy of Technical Education, Noida, India

Higher Secondary Education (12th Grade) — Army Public School, Prayagraj, India

PROJECTS

AI-DRIVEN DIGITAL TWIN FOR RAILWAY MAINTENANCE | Jul 2026 - Present

- Developing an AI-driven digital twin concept for railway assets to support maintenance monitoring and data-driven decision making.
- Exploring digital representations of railway assets and maintenance conditions to improve asset visibility and maintenance workflows.
- Applying AI/ML and data-processing concepts toward predictive maintenance and early identification of maintenance requirements.

AI PLACEMENT BUDDY | React.js, Node.js, AI/ML

- Developing an AI-powered placement assistant for personalized job preparation, resume improvement, and interview practice.
- Designing a conversational workflow that uses user inputs to generate tailored preparation recommendations and actionable feedback.
- Building a web-based assistant that centralizes placement preparation and improves the student job-search experience.

WEB APPLICATION & UI PERFORMANCE OPTIMIZATION | JavaScript, React.js, HTML/CSS

- Designed and developed modular, responsive interfaces using clean and maintainable frontend code.
- Performed functional testing and debugging across multiple browsers and device viewports.
- Managed application state and optimized frontend networking calls to reduce rendering latency.

ACHIEVEMENTS

- Screened for the Services Selection Board (SSB) twice through a competitive selection process.
- Consistent practice of Data Structures & Algorithms and coding problems to strengthen programming and problem-solving ability.

ROLE-RELEVANT STRENGTHS

Engineering: Problem Solving, Clean Code, Debugging, Testing, Application Flow Validation, REST API Integration

Enterprise Focus: Data Handling, SQL, OOP, Backend Development, Full-Stack Development, AI-enabled Applications

Technical Interests: Data Structures & Algorithms, AI/ML, Software Engineering, Scalable Web Applications
